How to make a wav file

Here we make the example file through Sound Recorder of Windows.

You can choose other software to finish the file.

(WAV format: 8.000 kHz, Mono 1kb/sec)

Step:

Select "Start" -> "Programs" -> "Accessories" -> "Entertainment" -> "Sound Recorder" on system.

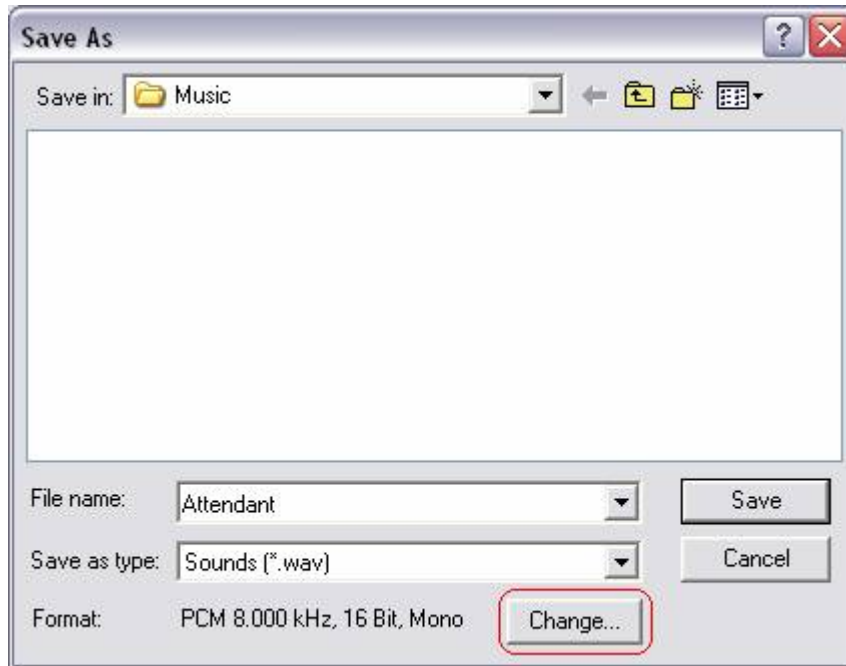

1. Record a prompt message.

2. Save the file as.....

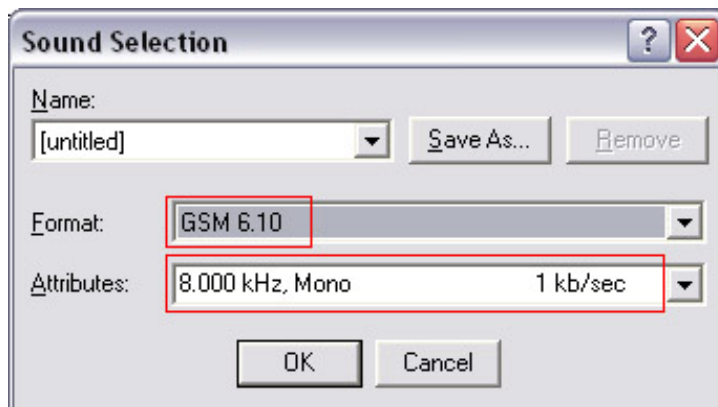

3. Change the format, click "Change..."

4. Make an option on "Sound Selection"

Format: GSM 6.10

Attributes: 8.000 kHz, Mono 1kb/sec

5. Click Ok to save the changes, and then save the file.
