

The flexible and versatile 4 line home or office phone system.

AN 4x4 PABX and 2 Way Router

Aristel

The feature-packed AN 4x4 also offers:

- > Works with all standard telephone handsets
- > Internal and external caller ID
- > Caller ID passed to extension
- > External music/message on hold port
- > Supervised or unsupervised call transfer
- > Call forwarding - internal and external
- > Routing options on all extensions and all lines
- > LCR/ARS. Configure dial plans to suit VoIP, GSM gateway and PSTN lines
- > Compact and programmable from handset or PC
- > Call diversion to mobile

The Aristel 4x4 is so versatile, it can automatically select the line type to suit the call destination; PSTN lines, VoIP, or even a wireless GSM Gateway. A combination of up to four allows maximum flexibility at minimum call cost.

Your home or business can enjoy the economies of VoIP and free mobile to mobile calls on the same account, while fixed lines allow cost-effective call routing options.

Make your small business more professional by connecting music or message on hold.

The compact unit installs in minutes and offers plug and play programming from handset or PC.

Compact PBX for a fraction of the cost!
