1.3 Feature Highlights:

- 128*64 Pixel LCD with Support Chinese display
- HD Voice: HD Codec
- 2 VoIP accounts
- Enterprise Phone Book
- 12 programmable hard keys and support BLF

- Support Plug and Play
- Support PoE and AC power adapter
- Support HTTP/TFTP/FTP Auto-provision/TR069 for upgrade software

1.4 Technical Features

Item	320/330 Series
Screen	Grayscale LCD with background light
	128*64 pixel, 4 display, 2.3 inch.
Line	2 (320 model); 3 (330 model)
Language	Multi-Language(e.g.CN/EN/Spain/Portugal/Poland/Turkey/French/Italy etc.)
Function Keys	4 Soft keys,2 Line keys(dual-color LED) 6 Navigation keys(arrow button, OK button, C button) Volume adjust, Hands-free, Mute, Headset, Message, Menu, Directory, Service, Hold, Redial, Conference, Transfer
VoIP Protocol	SIP 2.0
Network Protocol	HTTP, BOOTP, FTP, TFTP, IEEE 802.1Q, *IEEE 802.1X
Codec	G.723.1(5.3Kb/s,6.4Kb/s), G.729 A/B(8Kb/s), G.711 A/U, G.722(64Kb/s)
QoS	TOS, Jiffer Buffer, VAD, CNG, G.168 (32ms)
Network	2×RJ45 10/100M Ethernet Interfaces (LAN/PC) [WIFI model is only have 1×RJ45 10/100M LAN Ethernet Interface] IP Assignment: static IP, DHCP, PPPoE PC port support Bridge and Router DNS SRV,STUN, VPN(L2TP), VLAN/QoS STUN,DTMF(In-band/RFC2833/SIP INFO)
Voice	HD Voice: HD Codec/Handset/Speaker(Full-duplex) Handle, Headset and Hands-free mode available Support call centre headsets and PC headsets Separated 9 Level Volume Adjustment
Call Processing	Line Status Indicator Multi Account Always Forward, Busy Forward, No-answer Forward Hotline line (Immediately/Delay) Call Waiting, Call Queuing, Line Switching Call Forward, Call Transfer, Call Holding, Call Pickup, *Callback One Key Dial, Redial Phone directly speed dial, Call record direct dial 3-way conference, SMS

	DnD, Blacklist Voice mail, Voice Prompt, Voice Message BLF, BLA, Speed dial P2P(Peer-to-Peer)
PBX	Call Transfer, Call Pick-Up, Network-Meeting, DND, Call Waiting, Call Hold. Call Barring, Call Back On Busy, Anonymous Call ,Intercom, Paging
Security	Login the website by password Login the LCD by password Signaling encryption(RC4) Media encryption(RC4) VPN, 802.1X, VLAN QoS(802.1pq), *LLDP TLS, MD5,AES, ROOT/USER Management
Application	LDAP(2): search someone in two LDAP server. Enterprise phone directory, download with server, and it support 800 contacts Public phone directory XML Phonebook : Search /Input/ Out put Private phone directory: input/output 300 contacts, every contact can save 3 numbers and the size of number is 19 byte. Call History(600): every records is 200 with Miss Calls /Received Calls/Dialed Calls. Voice Message, Voice Mail Box, Light of Message. Ringing Update, Input, Del, *we also support to order the other APP.
Power Supply	Power adapter: AC 100-240V input and DC 12V/1A output PoE (IEEE 802.af); USB(Standard DC 5V)
Specification	DSPG Chipset Storage Temperature: 0℃ ~ 60℃ Operating Humidity: 10%~90% Size: 287mm*214mm*90mm Net weigh: 1.2kg
Certifications	CE、FCC、RoHS、Avaya、Broadsoft、Alcatel、Yeastar、Digium

Note: “*” Sign means function has not been published yet.

2.Connecting Your Phone

Your system administrator will likely connect your new 320/330 Series IP Phone to the corporate IP telephony network. If that is not the case, refer to the graphic and table below to connect your phone.

- 1) Open the 320/330 series IP Phone box; carefully check the packing list, Packing List as follows:

Item	Counts
IP Phone	1
Handset	1
Handset Cord	1
Power adapter	1
RJ45 cable	1
CD	1
Quick Installation	1
Quick User Guide	1
Product certification	1

- 2) As shown in figure 2.1 and figure 2.2, Please plug Handset Cord into RJ9 interface(IP Phone and Handset), RJ45 cable into the LAN interface; IP Phone will automatically start if IP Phone with POE function.

- 3) The phone must work together with power adapter without POE support.

- 4) Connect your computer to PC interface of the phone with cable.

* More detailed description please refers to the *3.Phone overview-Understanding phone buttons and hardware*.

5	Soft key labels	Each displays a soft key function (displayed on your phone screen), and the function is different when menu changes.

4. Basic Call Handling

You can perform basic call-handling tasks using a range of features and services. Feature availability can vary; see your system administrator for more information.

Note: The bold type of the following text and following a “button” in table signifies the phone's button (for example, **Speaker** button), and the coming call can use Ans(Answer) signifies soft key.

4.1 Placing a Call

Here are some easy ways to place a call on SayHi IP Phone:

If you want to...	Then...	
Place a call using the handset	Pick up the handset	--1) You can hear the dial tone; --2) The first line light is  ;
Place a call using a	Press Speaker ,	--3) Enter a number;

speakerphone	or Programmable buttons	--4) Press '#' button (default) , -or press Send ; -or wait 5s (default), then it send the number automatically.
Place a call using a headset	Put on your headset and active Headset button, and then do as using speakerphone	
Redial	--Press REDIAL button to dial the last number -or press Navigation button-Right > "Dialed number", select a number, and press Dial	
Dial from a call log	--1) Press MENU or OK button > "Call history", you can select "Missed calls", "Received calls" and "Dialed numbers", - or press Navigation button (in Standby interface) > select "Missed calls" (down), "Received calls" (left) and "Dialed numbers" (right) ; --2) Then press Dial button.	
Place a call while Another call is active	--1) Press Hold button or soft key Hold ; --2) Press again the line one or the other line , you can enter another number; --3) Press '#' button (default) ; -or press Send to send the number.	

Tips

- You can dial on-hook, without a dial tone (pre-dial). To pre-dial, enter a number, and then go off-hook by lifting the handset or pressing **Send**, **Headset** or **Speaker** button.
- If you make a mistake while dialing, press **C** button to erase digits.

4.2 Answering a Call

You can answer a call by simply lifting the handset, or you can use other options if they are available on SayHi IP Phone .

If you want to...	Then...	
Answer with a handset	--1) Your phone ring; --2) Line button of the ringing line is Red  and flashing, Light strip is Red  and flashing;	--Pick up the handset
Answer with the speakerphone (Non-headset)		--Press Speaker button -or press the flashing  Line button,

mode)		-or press Ans

(extension number) ,-Authen usr: the Authenticated users matched with the SIP server. (The default With the same account)-user pwd*: the user password matched with the SIP server-Description: description of this account,-SIP1*: the primary SIP server, By default all calls through the server,-SIP2: the secondary SIP , When the primary server is unavailable ,use the SIP server-Refresh time: Registration refresh interval, the minimum value is 20 The default value is 3600.

	<p>--5) Set up the above parameters, select “Submit changes” to saves settings, Complete the account creation.</p> <p>* Note: the parameters with the * mark must be set.</p>
Disable sip account	<p>--1) Select “System setting” > “Advanced setting”;</p> <p>--2) Enter the password required (The default is empty) ;</p> <p>--3) Select “SIP” > “Account sip”;</p> <p>--4) Select “Enable account” > “Disable”;</p> <p>--5) Select “Submit changes” to saves settings</p>

6.2 Network Setting

If you want to ...	Then...
network setting	<p>--1) Choose “System setting” > “Advanced setting”;</p> <p>--2) Enter the password required (The default is empty) ;</p> <p>--3) Choose “Network”, you can configure the following parameters:</p> <ul style="list-style-type: none"> -Type: static IP or DHCP -IP: enter IP address , Note: Do not duplicate the IP address with other devices on the network -Mask: enter appropriate subnet mask -GW: enter appropriate gateway - DNS1: enter IP address of the primary DNS server - DNS2: enter IP address of the secondary DNS server -Web port: the default Web port is 80,if you change it(for example change it to 88),you must use IP and Web port to login the web page (for example http://192.168.0.200:88).It will take effect on next reboot. -Telnet port: the default Telnet port is 23,if you change it(for example change it to 2003),you must use IP and Telnet port to login the manage page (for example telnet 192.168.0.200:2003).It will take effect on next reboot.

6.3 Load default settings

If you want to...	Then...
Load default settings	<p>--1) Choose “System settings” > “Advanced settings”;</p> <p>--2) Enter the password required (The default is empty) ;</p> <p>--3) Choose “load default settings”, and press 'OK', then go back and press “Reboot” the phone.</p>

6.4 Customizing Rings and Volume

If you want to...	Then...
Change the ring tone	<p>--1) Choose “System setting” > “Phone setting” > “Ring type”;</p> <p>--2) It will auto ringing. Press navigation to choose ring tone;</p> <p>--3) Press OK to set the ring tone,</p> <p>Press Back soft key to cancel</p>
Adjust the volume level	<p>--1) Choose “System setting” > “Phone setting” > “Volume setting”;</p> <p>--2) You can adjust the volume level of following types</p> <ul style="list-style-type: none"> -Ring volume: Phone call ring volume, -Handset volume: Handle output volume, -Handset mic volume: Handle input volume, -Speaker volume: Hands-free speaker output volume, -Speaker mic volume: Hands-free input volume, -Headset volume: Headphone output volume, -Headset mic volume: Headset microphone input volume

6.5 WIFI setting(only WS320 has this item)

Tips: The WIFI ip phone support 802.11b/g/n, not support 802.11a.

If you want to...	This...
Set WIFI	<p>--1)Choose "Menu">"System settings">"advanced settings">"advanced password (default is empty)"</p> <p>--2) Press navigation to choose WIFI settings;</p> <p>--3) Press "ok" button to change the it Enable or Disable</p> <p>-Set WIFI IP: Default IP: make it default setting , Modify IP: change it what you want. Mode: mode one: change the wifi IP 10.0.X.X/8 ;mode two : change the wifi IP 1.0.X.X/8 (it can prevent IP conflict)</p> <p>-Current site: the wifi which the phone use now and information</p> <p>-WPA/WPA2: select the encryption mode(AES/TKIP)</p> <p>-Site list: search site what you want to connect.</p> <p>--4) Press "site list", choose one wifi network which the phone searched</p> <p>-SSID: SSID name</p> <p>-BSSID: the mac address of the WIFI network</p> <p>-Channel:the channel of the WIFI network use</p> <p>-Type:the type of the WIFI network</p> <p>-Encrypt:the encrypt of the WIFI network</p> <p>-Signal:the signal of the WIFI network</p> <p>--5) Press "SSID", set WIFI which you choose</p> <p>-Encryption: the encryption of the WIFI network</p> <p>-Key type: the key type of the WIFI network</p> <p>-Key: the password which you should set to allow yourself to enter the WIFI network</p>

6.6 View status

If you want to see the phone status, Press **MENU** button > “view status”, or press **OK** button > “view status”, you can see the detail information of the phone.

If you want to	Then.....
Network	You can see the network detail information of the phone
Lines	You can see the SIP account
software	It include phone Mode、software version、kernel version、 Upgrade date、 Running time
Expansion	Can check the expansion, if your phone support this feature.

6.7 Diagnose

If you want to check the phone hardware function, Press **MENU** button > “diagnose”, or press **OK** button > “diagnose”, you can check the phone item as below.

If you want to	Then
Keys	You can check the phone keys
LCD	Press ' OK ' to start, press ' C ' to exit
Lights	Press ' OK ' to start, press ' C ' to exit
Sound	Press ' OK ' to start

7. Web Settings

In addition to the phone user interface, you can also customize your phone via web user interface. In order to access the web user interface, you need to know the IP address of your new phone. To obtain the IP address, press the C key on the phone. Enter the IP address (e.g. HTTP://192.168.0.10 or 192.168.0.10) in the address bar of web browser on your PC. The default user name is root (case-sensitive) and the password is root (case-sensitive).

NOTE: Here use the example with 320. All of the other 320/330 series ip phone was looks like as below.

Main Interface-Phone Status

Here you can see as below information: System Run Time, Register Status, Network Status, System Information,

ITEM	DESCRIPTION
System Run Time	The phone system normal running time.
Register Status	The status with Account 1~3. EX Module status.
Network Status	The status with LAN, MAC, LAN IP, Net mask, Gateway, Primary DNS, Secondary DNS, VPN IP, PC IP, PC Net mask, Device Type, DHCP Server.
System Information	The status with Phone Model, Software Version, Hardware Version, Hardware ID, Kernel Version, Auto-Provision Server URL, TFTP Server IP.

7.1 Net Work

7.1.1 LAN Port

NOTE: For the WIFI model, it didn't have the LAN port, but it can setting the LAN information.

Please Note: Changing the default HTTP Port (80) will require using the new port number to access the IP phone web interface. Please note that changes require a reboot. Use the following format when not using the default HTTP (http://ip address:portnumber).

ITEM	DESCRIPTION
Port Management Settings	
HTTP Port	The default web port is 80,if you want to change it(for example change it to88), You must input IP and Web port to login the web page(for example HTTP://192.168.0.200:88). It will take effect on next reboot.
Telnet Port	The default Telnet port is 23,if you want to change it(for example change it to 2003). You must input IP and Telnet port to login the manage page (for example telnet 192.168.0.200:2003).It will take effect on next reboot.
Socket5 Proxy Server	

Socket5 Proxy Server	Enable/Disable Socket5 Proxy Server.
Server IP	Socket5 Proxy Server IP address.
Port	Socket5 Proxy Server port, default is 1080.
Anonymous Login	Enable/Disable Socket5 Proxy Server login username.
Paging Setting(NOTE: This feature priority is followed the serial number, In other words, "paging 1" is the highest priority)	
Paging1	Enable/Disable Paging feature.
Group IP and Port	Group IP and Port with Paging.

7.1.2 PC Port

Normally choose Bridge, if you choose Router ,you need to input router IP address ,net mask.

The screenshot shows a configuration panel for the PC Port. At the top, there are two radio buttons: 'Bridge' (selected) and 'Router'. Below these are several input fields: 'IP Address' and 'Netmask' (both marked with an asterisk), 'DHCP Server' (with radio buttons for 'off' and 'on'), 'Start IP', and 'End IP'.

Bridge

Normally, you should choose “bridge” feature, it means that pc port and LAN port will share the same network.

Router

Router feature is for the phone PC Port. You must input IP address (it's equivalent to a gateway) and Net mask. If you want to use DHCP function, please turn it on, input start IP and end IP.
